

DEEPA RAJASABESON

Marietta, Georgia | 678-662-9052 | deepa.nextjob@gmail.com | US Citizen | 20 Years Experience

SUMMARY:

Following the completion of my contract assignment in February 2024, I took a planned career pause to address few temporary family responsibilities that required my full attention before returning to the workforce with long-term stability for the next 20 years to be in career field in AI Era.

Rather than treating this period as a break from my profession, I made a deliberate investment in my technical growth. I pursued graduate-level education in Artificial Intelligence and Machine Learning, earned Microsoft Azure AI certifications, completed advanced training in Python, Azure AI, Agentic AI, and cloudnative development, and built numerous hands-on projects using modern AI technologies including Azure OpenAI, Azure AI Foundry, LangChain, LangGraph, Microsoft Agent Framework, Model Context Protocol (MCP), Retrieval-Augmented Generation (RAG), and Azure cloud services.

I also remained actively engaged with the technology community by participating in Microsoft AI Tours, Microsoft Build, Microsoft Ignite, developer conferences, AI boot camps, and continuous self-directed learning to stay current with the rapid evolution of AI and software engineering.

This planned and professionally productive transition has strengthened my capabilities significantly. Today, I return to the workforce with deeper expertise than when I left full-time employment, combining many years of enterprise .NET and Azure development experience with modern Python, AI, Machine Learning, and Agentic AI engineering skills. I am fully prepared to contribute immediately to teams developing intelligent, cloud-native applications and AI-powered business solutions.

- Taken special training and practice with GitHub Copilot (integrated with VS 2022/2026) and Claude Code (Integrated Terminal in VS 2026) to manage a full .NET Enterprise solution. Used extensively GitHub Copilot to create .Net and Python Projects in VS Code and Visual Studio 2026.
- AI-focused Engineer with recent specialization in AI engineering, Azure AI services, and Agentic AI development. Experienced in designing and deploying AI-powered applications using Azure OpenAI, Azure AI Studio, Azure AI Foundry, and Cognitive Services.
- Hands-on experience building RAG-based chatbots, autonomous AI agents, and multi-tool AI systems using LangChain, LangGraph, LlamaIndex, Semantic Kernel and Microsoft Agent Framework (C# and Python SDKs).
- Work Smarter with AI: Adopt AI-assisted coding agent tools (e.g., GitHub Copilot, Claude Code, Cursor.ai, Lovable.Dev(for UI) etc.) to accelerate development, reduce boilerplate, and focus on solving business-critical problems.
- "Azure Developer Associate with hands-on experience designing and deploying serverless solutions using Azure Functions, Azure Logic Apps, and Event-driven architectures.
- Designed and deployed serverless AI-enabled microservices using Azure Functions to automate data processing, integrate APIs, and support scalable cloud-based workflows.
- Designed Even-driven order system with Azure Service Bus for async Messages, Mass Transit, OpenTelemetry Observability.

- Implemented circuit breaker and retry patterns using Polly for Production resilience.
- Built event-driven, serverless APIs and background jobs using Azure Functions, improving scalability and reducing infrastructure overhead.
- Developed MCP (Model Context Protocol) servers and AI-integrated Python and .NET applications enabling natural language interaction with databases and APIs. Strong background in integrating AI solutions with Python, .NET 8/9, ASP.NET Web API, and Azure cloud services, including microservices architecture and CI/CD pipelines in Azure DevOps.
- Experienced in deploying machine learning models using Hugging Face, Streamlit, Flask API, and Azure Machine Learning Studio.
- Hands-on learning through Microsoft AI Tours, AI workshops, and advanced AI programs. Passionate about building production-ready AI systems that automate workflows, enhance user experience, and deliver measurable business value.
- **Microsoft Certified in Azure AI Engineer (AI-102), Azure Developer Associate (AZ-203), and Azure AI Fundamentals (AZ-900)**, demonstrating validated expertise in designing and implementing AI and cloud solutions on Microsoft Azure.

AI SKILLS:

AI & Cloud AI Platforms	Azure AI Studio, Azure OpenAI, Azure AI Foundry, Azure Cognitive Services, Azure AI/ML, Azure AI Search, Azure OpenAI Assistants, Azure AI Agents, Azure Machine Learning Studio
AI/ML Libraries & Frameworks	Python with FastAPI, Keras, TensorFlow, Scikit-Learn, Pandas, Numpy, Matplotlib, Pydantic, XGBoost, PyTorch, Seaborn, PySpark, SciPy, Neural Networks, CNN, Seaborn, RAG
Foundation Models & AI Tools	HuggingFace (to access Foundation Models from Python), IDE like Google Colab, Cursor IDE, Kaggle, groqCloud,
Agentic AI Frameworks & Protocols	LangChain & LangGraph, LangSmith, LlamaIndex, LangFlow, MCP (Model Context Protocol), A2A (Agent 2 Agent Protocol), ADP (Agent Development Kit), <i>Microsoft Agent Framework (C# SDK & Python SDK)</i>, DevUI, MCP - Model Context Protocol (C# SDK & Python SDK), MCP Inspector
AI Development – Vibe Coding Tools	GitHub Copilot, Claude Code, Lovable.AI Cursor AI, Replit AI, Perplexity, Microsoft Copilot, Google Gemini, & Bolt.new for Frontend UI Code, ChatGPT/Gemini/Claude/Perplexity chat agent app for Plan & Code Snippets using prompts while debugging.
Cloud & Containers	Microsoft Azure, Azure WebApp, Azure AD, Azure Storage, Kubernetes Cluster, Docker, Container Registry, Azure VM, Cosmos DB, Azure SQL, Azure Monitor,

	Azure Advisor, Azure Service Health, Azure Policy, Azure API Management, Azure PowerShell, Azure CLI, Azure PaaS Services, Kusto Explorer, CI/CD Pipeline, Azure Key Vault, Azure Service Bus, Rabbit MQ, Azure Logic App, Azure Functions, Azure Web App, Azure Cosmos DB, Azure DevOps, Azure Blob Storage, Azure AI Foundry, Azure Purview, Azure Copilot Studio, Oracle Database @Azure
--	--

EDUCATION:

Course	Institution	Percentage
Post Graduate Degree in AI/ ML - Artificial Intelligence / Machine Learning 2025 https://la.utexas.edu/texasexeced/digitalVerification.html?key=gweupwzr	University of Texas at Austin (Aug 2025) https://www.mygreatlearning.com/certificate/YTWTREVQ	4.24/5 GPA
Associate Membership in the Institute of Engineers (AMIE Section A) - – Equivalent to Engineering Degree	The Institution of Engineers, Calcutta, India	52%
Post Diploma in Computer Applications	Thiagarajar Polytechnic, Salem, Tamilnadu, India	84%
Diploma in Electronics and Communication Engineering	Govt. Polytechnic, Madurai, Tamilnadu, India	82%
Certificate courses in various languages	Ohlone College, Fremont, USA	80%

CERTIFICATIONS:

- Certificate: AI Agent Engineering – Rakesh Gohel (Sep 2025)
- Ongoing: Agentic AI Program – Johns Hopkins University (Ongoing since Feb 2026)
- Microsoft Certified: Azure AI Engineer Associate – AI-102 (Jan 2025)
- Microsoft Certified: Azure Developer Associate – AZ-203 (May 2020)
- Microsoft Certified: Azure AI Fundamentals - AZ-900 (Apr 2020)
- Certificate on AZ-400 : Azure DevOps in Udemy (Jul 2023)
- Modern AI Pro Essentials (Nov 2024), Practitioner (Aug 2025), Agentic AI(Apr 2025) Bootcamps conducted by Mitra Robot Team <https://mitrarobot.com/modernaipro>
- Sun Certified Programmer (86%)
- Business Professional Programmer (Grade A) award by Computer Society of India, AICTE, DOE. • DOEACC (Department of Electronics Accredited Computer Courses by Indian Government) 'O' and 'A' Level Examinations
- Attend Atlanta Code Camp, Atlanta Developer Conference, SQL Saturday, Microsoft AI Tours events every 6 months since 2023 (Atlanta-Apr 2025, Chicago-Sep 2025, New York-Jan 2026, Atlanta upcoming Apr 2026) to follow up the frequent changes in Names and new AI services and Agentic Frameworks releases in Azure Services stack. Took part in 3-4 hands-on working session in every Conference and continued their practice.
- Follow-up regular News Updates to follow the happening in AI/ML world in Silicon valley by attending refresher sessions with MitraRobot once in 3 months bootcamp
- Attend Microsoft Build event, .Net Conference, Microsoft Ignite, to follow up new releases, updates to keep up Technology Evolution
- Completed a live workplace project using Angular 8 and ASP.NET Core 3.1 with SQL Server backend. High-Level Design Document and full Frontend (Angular) and Backend (.NET Core Web API) code available at: <https://github.com/deeparajasabeson/PTOTimeManagement.git>

PERSONAL PROJECTS:

Python Azure Computer Vision Service for Image Analysis

Designed, Coded a project where images analysis, edit, generate new images can be done based on user prompts. Created Foundry project with added knowledge sources with multiple documents, with user prompts can ask different queries to fetch results from the indexed documents using the agent created in Foundry Hub.

- <https://github.com/deeparajasabeson/azure-vision-and-foundry-services>

Python FastAPI project with SQL Server

Designed, Coded a FastAPI Python project to display data stored in SQL Server tables and create Web API endpoints.

- <https://github.com/deeparajasabeson/FastAPI>

.Net Core+Angular Project :

Designed, Coded, Deployed as Azure Web App solution to practice to get end-to-end experience.

PTO Time Management Tool - C#, Angular, Sql Server with a Detailed Design Document prepared during System Analysis with client :

- <https://github.com/deeparajasabeson/PTOTimeManagement/blob/master/Final%20Draft%20PTO%20High%20Level%20Design%20Document.pdf>

Academic Projects:

Jan 2025 – Sep 2025

Projects Done while graduating PGP AI/ML from University of Texas at Austin

Tech Stack : Python, Streamlit, Flask, Deployed on Hugging Face

- **Model Deployment – Hugging Face** ○ <https://github.com/deeparajasabeson/ModelDeployment-HuggingFace-ExtraaLearn>
- **CNN – Plant Samples Classification (Computer Vision)** ○ https://github.com/deeparajasabeson/CNN_ConvolutionalNeuralNetwork_PlantSamplesClassification_ComputerVision
- **RAG – Medical Assistant Manual** ○ https://github.com/deeparajasabeson/RAG_MedicalAssistantManual
- **RAG – Application in Python** ○ https://github.com/deeparajasabeson/RAG_Application_in_Python
- **Neural Network – Street View House Number Digit Recognition** ○ https://github.com/deeparajasabeson/NeuralNetwork_StreetViewHouseNumberDigitRecognition
- **Employee Promotion Prediction – Logistic Regression** ○ https://github.com/deeparajasabeson/EmployeePromotionPrediction_LogisticRegression
- **Personal Loan Campaign – Decision Tree** ○ https://github.com/deeparajasabeson/PersonalLoanCampaign_DecisionTree

Recent GitHub Projects:

Oct 2025 – Jan 2026

Microsoft Agent Framework & Model Context Protocol (MCP) – Python SDK, C#.Net SDK ○

<https://github.com/deeparajasabeson/microsoftagentframework-and-mcp>

AI Agent using LangChain with RAG, Multi-Tool, Autonomous Agent - Python ○

GitHub: <https://github.com/deeparajasabeson/Multi-Tool-Autonomous-AI-Agent>

PROFESSIONAL EXPERIENCE:

**Python &.Net Core Azure AI Developer
Internship in startup companies**

Sep 2024 – Nov 2025

I keep experiences below from 2017; started these items in 2013. In India for about 6-7 years please give a cll

- **My Portfolio given space by UT Austin for Alumni students :**

<https://www.mygreatlearning.com/eportfolio/deepa-rajasabeson>

- Expanded technical stack by adopting Python as the main development language alongside C# and integrating Azure AI Services into application design and delivery.
- To gain real-time, hands-on production development experience, interned with few small-scale startup companies to customize prototype products based on client requirements—leveraged referrals from AI Bootcamps Modern AI Pro Alumni group (MitraRobot.com) where majority cohorts are startup CEOs and Founders in AI /ML Products in Bay Area, CA..
- During the tenure of this mentioned time period joint with multipole teams from 3 different small Startup CEO

Project 1 :

Company had a product for High Court lawyers to refer to answer their queries. They launched their 3-4 months back when they joined the team. Their second client was asking for some changes based on their policies. . Team needed a Developer to help them to rearrange to have a customized project.

- The main portion is Developed and deployed AI-integrated applications leveraging Azure AI Foundry, Azure AI Studio, Azure OpenAI APIs, and Azure Cognitive Services, Azure Copilot Studio

Project 2 :

- Created custom model whatever worked out earlier in Python converted in Azure Portal using - Azure Machine Learning Studio.
- Built Retrieval-Augmented Generation (RAG) based chatbots and AI Agents using LangChain, LangGraph, and Microsoft Agent Framework with both Python and .NET SDKs.

Project 3 :

- Designed and implemented microservices using .NET 8 on Azure, improving scalability and enabling reusable architecture across projects.

Project 4 & 5:

- Developed an MCP Server to manage database operations (read, insert, update) and built a natural language-based chat application allowing users to perform database activities without writing SQL queries.
- Built an MCP Server that converts API endpoints into callable tools for AI Agents (MCP Client).

GitHub:

<https://github.com/deeparajasabeson/microsoftagentframework-andmcp/tree/main/dotnet/Model-Context-Protocol/MCP-API-MCPServer>

Project 6 :

- In another client project, engineered multiple Agentic AI solutions to automate repetitive tasks using Azure AI capabilities.

- Deployed AI models on Hugging Face, built UI using Streamlit (Python), and developed backend services using Flask API (Python).
- Created Azure Logic App workflows functioning as MCP Servers to be used as tools by AI Agents in Azure AI Foundry.

Fiserv Financial Services Technology & Payments Innovation Inc. Apr 2023 – Feb 2024 Backend Python, .NET Web API Azure Developer (Contractor – Converge Technology Solutions Inc.)

- Designed and implemented microservices using Azure Logic Apps, Azure Event Grid, and Cosmos DB, improving ETL processing by 25%.
- Worked in a 11 people Team, my contribution was mainly on supporting Team Lead for developing Azure Logic Apps and development & implementation of Azure Functions.
- Involved in independently making Logic Apps for the Migration Orchestrator tool
- Designed an Azure Functions-based workflow triggered by HTTP requests and Service Bus messages to process and send email notifications
- Developed serverless APIs and background jobs using Azure Functions (HTTP, Timer triggers) integrated with Azure Storage (Blob) and Service Bus, improving scalability, reducing infrastructure management, , reducing manual effort by 60%.
- Integrated Azure Functions with Service Bus queues and Event Grid to implement event-driven processing and decouple microservices.
- Developed multiple Web API endpoints with hands-on backend implementation.
- Integrated Azure Service Bus for real-time communication between microservices and downstream systems.
- Improved API performance and reliability through Dependency Injection and clean architecture principles.
- Collaborated with cross-functional teams to deliver three microservice solutions within sprint deadlines.
- Had our code snippets which need to be called within Cloud in Serverless Azure Functions reducing maintenance costs by 20%. Worked on
- Achieved 100%-unit test coverage using MSTest and xUnit; optimized CI/CD pipelines in Azure DevOps.

Humana Medical Insurance, Louisville, KY (Remote) Apr 2021 – Dec 2022 Full Stack Azure .NET Web API Developer (Contractor, Atos Syntel Employee)

- Delivered feature enhancements for the Enrollment Hub application using .NET Core 3.1 and AngularJS.
- Built and optimized REST APIs, reducing response time by 40%.
- Implemented new features across both frontend and backend layers.
- Automated enrollment workflows using Azure DevOps pipelines and API integrations.
- Improved data consistency by refactoring ORM and validation logic with Fluent Validation and AutoMapper.
- Supported CI/CD deployments, increasing release frequency from monthly to bi-weekly.

Microsoft, Redmond, WA (Remote) Sep 2020 – Mar 2021 .NET Azure Developer (Contractor, Mindtree)

- Upgraded legacy Angular 5 applications to Angular 10 and enhanced the .NET backend to automate Azure identity management.
- Automated high-volume data ingestion into Azure Data Explorer (Kusto) using Azure Functions with timer/queue triggers and Kusto bindings, reducing manual effort by 80% and enabling near real-time analytics
- Developed Power BI dashboards to visualize system reliability and Azure resource analytics.

- Modernized CI/CD pipelines and ARM-template-based deployments for IPv6-enabled Azure VMs, accelerating cloud infrastructure provisioning and release cycles
- Refactored backend APIs and optimized business logic, improving data accuracy by 35%

Comcast, Atlanta, GA (Direct Hire)

Jun 2019 – Oct 2019

.NET Developer Level 2

- Developed .NET Core MVC applications integrating Angular 8 frontend with REST APIs for the Field Collections Tool.
- Designed and implemented Onion Architecture to improve maintainability and modularity.
- Achieved 100%-unit test coverage using MSTest and optimized query performance by 20%.
- Collaborated in Agile sprints to deliver the PTO Management system prototype on schedule.

ER Express, Atlanta, GA (Direct Hire)

Sep 2018 – Jan 2019 .NET

Developer

- Migrated legacy systems to .NET Core 2 and Angular 6, improving system reliability by 40%.
- Implemented secure authentication using .NET Identity and AWS Cognito.
- Enhanced user experience with reusable Angular components, reducing code duplication by 30%.
- Supported CI/CD deployments and cloud migrations to Azure SQL.

EY – Ernst & Young LLP, Alpharetta, GA

Feb 2017 – Aug 2018

.NET Developer (Contractor – Tata Consultancy Services Inc.)

- Provided production support for EY Canvas, a global audit platform operating across 24 data centers.
- Diagnosed and resolved backend issues using SQL queries, logs, and IIS traces, reducing defect resolution time by 25%.
- Automated incident tracking through ServiceNow and TFS integration.
- Collaborated with global teams to maintain 99.9% system uptime.

OTHER SKILLS:

Operating System	Windows 11 and Windows 10
Programming Languages	Python, C#, JavaScript, TypeScript, Gradio, Streamlit
.Net Technologies	ASP.Net Core 8, ASP.Net Core 3.1 / 2.2, .Net 6 , .Net 7, .Net 8, .Net 9, Entity Framework / Entity Framework Core, Web API, .NET Microservices with Ocelot API Gateway, Rabbit MQ, Microsoft Copilot for IDEs , Copilot for Office 365 Tools, .Net Aspire, Semantic Kernel SDK, A2A SDK, Microsoft.Extensions.AI, ML.NET
Front-end Technologies	HTML, CSS, jQuery, Bootstrap, Angular 12+
Tools	Google Colab Notebook, Visual Studio Code, Visual Studio 2022, MS SQL Server Management Studio 18
RDBMS	SQL Server 2017
NoSQL	Cosmos DB
Source Control	Azure DevOps, TFS Team Foundation Server, GitHub

Cloud and Containers	Microsoft Azure, Azure WebApp, Azure AD, Azure Storage, Kubernetes Cluster, Docker, Container Registry, Azure VM, Cosmos DB, Azure SQL, Azure Monitor, Azure Advisor, Azure Service Health, Azure Policy, Azure API Management, Azure PowerShell, Azure CLI, Azure PaaS Services, Kusto Explorer, CI/CD Pipeline, Azure Key Vault, Azure Service Bus, Rabbit MQ, Azure Logic App, Azure Functions, Azure Web App, Azure Cosmos DB, Azure DevOps, Azure Blob Storage, Azure AI Foundry
Methodology	Agile Scrum, Waterfall
